

SHARE A TOY, SHARE A SLIDE

BUT NEVER SHARE A HAT OR COMB

OR LICE COULD MAKE YOUR HEAD THEIR HOME

Wrentham Public Schools
Delaney School Health Office

Anyone can get head lice...
mainly through direct head-to-head contact but also from sharing
hats, brushes and other personal items.
Head lice are a problem in many communities and do not reflect
poor hygiene or social status.

Please do your part to prevent the spread of this condition by
checking your child(ren) daily on a regular basis. Lice infestation
is much easier to treat if caught early. If you should discover a
case of head lice, please notify your child's school nurse. Notify
the parents of your child's playmates. This is the best way to
protect your family and community. Here are a few resources that
you may find helpful:
